

Custom Millwork and Solid Wood Mouldings

With the ability to custom manufacture almost any profile, ETT Fine Woods is your partner for high-end solid hardwood mouldings. Capitalizing on our extensive lumber variety and inventory, custom mouldings can be made from a variety of exotic hardwoods and most North American woods.

From blueprint to final delivery, we are your one stop shop for architectural mouldings. We maintain a full line of custom millwork capabilities in-house using the best equipment available, including moulders, custom knife grinders, straight line and gang rip saws, band resaws, and trimming saws.

What information do I need to order custom mouldings?

Your custom millwork can be manufactured using a moulding sample, a tracing of the actual moulding, a CAD file or drawing. Our experienced millwork team will take it from there to create the exact knives needed to manufacture your custom architectural moulding.

What if I need help designing a custom moulding?

With extensive experience in running custom mouldings, you can depend on us from creating a moulding design through final delivery. The millwork team has decades of experience and a library of hundreds of moulding designs to help you. We can work with you to make what you are looking for.
