FSC® Certified Red Balau Decking, S4S,E4E, 6'-20'

4/4	1x4
5/4	5/4x6

FSC® Certified Hardwood Decking provides those who are looking for green building materials with a way to purchase high quality exotic hardwood decking.

FSC certification insures buyers of a legal and environmentally sustainable supply chain, while ensuring compliance with government procurement regulations. The Forest Stewardship Council® (FSC ®) is the only forest certification system that is supported by all major environmental groups.

Certified hardwood decking is a great way toward earning credit in LEED green building projects, such as the MRc7 credit.

East Teak Thompson is a Chain of Custody distributor and can provide you with our FSC certification if needed. This process monitors every step of the process, from harvesting, importation, milling, through shipping.

FSC® Certified Hardwood Ipe Decking is not only certified to be sustainable but has a longer service life than other softwood options. This extended service life of approximately 25 years means less replacement and a lower overall environmental impact.

ACCESSORIES - FINISHING TOUCHES & TOOLS

AnchorSeal²® End-Sealer for Hardwoods

AnchorSeal[®] is a high quality wax sealer that provides protection to prevent end-checking in freshly-sawn green logs and lumber. The sooner AnchorSeal[®] is applied after sawing, the more effective it will be in reducing end checking. Available by the quart.

Messmer's Wood Deck Cleaner and Brightener

Easy to use and biodegradable. Messmer's Wood and Deck Cleaner and Brightener (Part A and B) powder concentrates are specially formulated to clean and brighten exterior wood decks, porches, walls, and other exterior wood projects.

This two-part process removes superficial dirt and grime, and then removes deep tannin stains that result from extractive bleeding. Cleans up to 500 square feet per 16 oz. jar.

Messmer's Natural UV Plus for Hardwood Decks

Messmer's UV Plus for Hardwood Decks is an oil-based product that protects and conditions hardwoods, while also maintaining a natural appearance. It is produced with professional results in mind, providing water repellency and UV protection. Available by the gallon.

BoWrench[®] Deck Tool

The BoWrench[®] Deck Tool is a must-have for installation if you want straight gaps.

- Basic tool binds itself to any 2x (net 1-1/2") joist
- Frees up hands and legs, Gripper swivels for angled decking
- Interchangeable parts for pushing or pulling, Closes gaps up to 2-1/4" +
- Left or right handed. Simple to operate, Powerful mechanical leverage advantage.

DeckWise[®] Drill & Drive™

- 3-in-1 Pre-Drill, Countersink and Driver Tool
- Why have three separate tools when the DeckWise[®] Drill & Drive™ tool does the work of all three?
- Quickly install deck screws up to 3x times faster than standard drilling and driving screws. Plus it is a handy tool to have for miscellaneous projects around the house.
- Turn your drill into a 3-in-1 productive decking tool – after pre-drilling and countersinking with one of the included bits, pop the lock open, flip the insert to drive screws with the included star drive tip.

TEAK LUMBER

Teak, known as the “king” of hardwoods due to its long service life and durable characteristics, is a close-grained wood with high natural oil content. It is one of the most durable of all timbers, highly resistant to any rotting and almost impervious to the effects of hot sun, rain, frost or snow.

Durable – Teak is resistant to climate extremes, insects and fungus. It is not harmed by acids or alkali solutions. Plus, Teak’s inherent silica content and natural oils allow it to weather without the need of preservatives or sealants.

Restorable – Even after being left untreated for years, Teak can be restored to its original golden-brown color. Many prefer to let it weather to an attractive silver-gray. Teak that has been coated with finishes and oils can retain its original condition with regular applications.
